SCHEDULE “C” PROJECT INFORMATION and TIMELINES

The Town of Latchford's emergency preparedness project aims to enhance the municipality's ability to communicate effectively and operate efficiently during emergencies such as floods, wildfires, severe storms, and prolonged power outages. This project will focus on 2 key components: implementing a community alerting system and installing a backup generator at the Town's EOC.

The Alertable system will allow the Town to send real-time emergency notifications to residents through phone calls, text messages, emails and social media. This will ensure that timely and accurate information reaches the community during critical situations, helping residents take appropriate action to protect themselves and their property.

Grant funding will also be used to purchase and install a backup generator for the EOC. During emergencies, continuous power and communication are essential for coordination and decision making. The generator will ensure the EOC remains fully operational during power outages, allowing the Control Group to maintain internet, phone, and system access needed to manage emergency response efforts.

This project is necessary because reliable communication and operational continuity are vital to effective emergency management. As a small municipality with limited resources, the Town of Latchford must maximize its capacity to alert the public quickly and coordinate response efforts without interruption. Implementing these upgrades will significantly strengthen the Town's resilience, enhance public safety and support a more coordinated and informed response to any future emergencies.
