Clerk-Treasurer, Jaime Allen

The Town of Latchford Fire Department

*73 Empire Street
Box 10 POJ 1N0
Latchford, Ontario*

December 17, 2020

Fire Department update

1. The equipment from the old pumper has been transfer to our new one and the old one has been taken of the road. Wandering what you would like to do with it.
2. Looking for approval to perches a Honda Generator EU 2200 \$1,400.00 that is needed to run rescue equipment and work lights.

Fire hall update

The work on the fire hall is gradually coming along. The big doors and one back door have been installed. The North side door has been perches and on the list to be installed as well. Still some wiring to complete.

Fire Chief
Mike Beaupre

DEC 17 2020

Perry ,

Had the trailer on the laneway by Steve and Bonnies moved .
Continued brushing on Murphy mill road. Stopping now due to snow.
Plow and sander working fine.

Continuing to service and rebuild aqua flows.

Probably turn them on in the new year Hasn't been cold enough at this point.

Having 2 fire trucks in the shop is a pain in the butt ! Now that town truck is parked outside at night I may continue to take town truck home at night during the winter. It is more convenient to only warm up one vehicle in the morning. I will plug it in at my place when required. That's if it's ok with council. I will use it for work purposes only.

I plowed the roads a bit wide this last snow but I will shrink them up so people don't drive in the ditches. The snow was so white and fluffy I couldn't get any contrast !

With the lack of snow to date I am caught up with most projects around town.

I think I may clear a patch of the lake by the town docks and see if I can't make a skating rink for the kids.

I started back blading the sliding hill and hopefully it will be ready to use when we get a little more snow.

I was incorrect last month ! I had the wrong Sharon who tossed all my freezies and pop cycles!
George please tell your wife that I'm coming for her lol !

Have a great Christmas everyone.

Roger

Sent from my iPhone

Parkes + Ree.

We had our tree lighting Dec. 11th and it was a good turnout. The speaker came out and took some pictures of our event.

Dec. 13th we went out with volunteers and did our Christmas cheer deliveries to the seniors + children. Had positive feed back and children + seniors were happy with their delivery.

Will be working on our lists ahead for future to make it easier on the committee for future events with covid not going away in the near future.

Our next event is the fireworks New Years Eve at 7pm at the beach area. Fireworks are ordered + flyers are now out and posted on the town facebook page.

DTSSAB we are currently working on the budget.

1. The first part of the question is about the definition of a function. A function is a relation between a set of objects (the domain) and another set of objects (the codomain) such that each object in the domain is related to exactly one object in the codomain.

2. The second part of the question is about the domain and codomain of a function. The domain is the set of all objects that can be input into the function, and the codomain is the set of all possible outputs of the function.

3. The third part of the question is about the range of a function. The range is the set of all objects that are actually output by the function. It is a subset of the codomain.

4. The fourth part of the question is about the graph of a function. The graph of a function is a set of points in a coordinate plane where the x-axis represents the domain and the y-axis represents the codomain. The points in the graph represent the input-output pairs of the function.

5. The fifth part of the question is about the vertical line test. The vertical line test is a way to determine if a graph represents a function. If a vertical line intersects the graph at more than one point, then the graph does not represent a function.

6. The sixth part of the question is about the horizontal line test. The horizontal line test is a way to determine if a graph represents an injective function. If a horizontal line intersects the graph at more than one point, then the function is not injective.

7. The seventh part of the question is about the surjectivity of a function. A function is surjective if every object in the codomain is the output of the function for at least one object in the domain.

8. The eighth part of the question is about the bijectivity of a function. A function is bijective if it is both injective and surjective.

Mayor's Report, December 17, 2020

Discovery Channel Documentary

This project seems to have taken on a life of its own and I am still getting requests from Lucy Adkins of Brite Spark Films, as recently as Tuesday. I had provided her with contact information for an engineer from the project and now she is looking for any digitized information we might have on the Sgt Aubrey Cosens VC Bridge and Aubrey himself. I pointed out to her that I had provided a wide array of photos and memorabilia to her film crew but they chose to ignore it. I suggested that she should contact CTV and MCTV Timmins as they had done extensive coverage of the dedication in 1986 and the failure in 2003. The documentary is scheduled for completion in mid 2021 and she has assured me we will get a copy.

Sgt Cosens Memorial Bridge Rebuild

I have been advised by various sources that a major rebuild of the Sgt Cosens Bridge is scheduled for anywhere from 2 to 5 years. As any rebuild of the bridge will involve crossing Town of Latchford property, in particular the Veteran's Park and we all know what happened to that area the last time. I will continue to attempt to get a firm understanding of when they propose to begin this project and what it will entail.

Dam Operation/PSPC Land

During the month I received my bi-monthly phone call from Ravi Sundaraj and John Ikonomopoulos to exchange concerns and issues. I expressed that the property survey seemed to be dragging and they mentioned that Helene would be advising me that they had found a pottery shard which was being reviewed. I acquired a picture of the shard and shared it with John Pollock and Ryan Primrose for their opinion. Ryan responded, "This appears to be 20th C. blue transferware, and of similar age to some of the 20th C. refuse we located during the Stage 2 work."

Helene further stated they are awaiting the R plan for the property to proceed with the transfer. On the good news front, Helene advised the new signs are ready for the dam and will be on site before Christmas and she will advise us as to when they will be installed.

Temagami Forest Management Corporation

The Minister of Natural Resources and Forestry, John Yakabuski, notified the Temagami Forest Modernization Advisory Team on December 15 that the Temagami Forest Management Corporation had been formally approved. This morning at 10:00 am we had a 2 hour conference call. Initial municipal representation nominated for the Board of Directors, subject to confirmation by the Provincial Appointments Secretariat are Jeff Barton for Latchford, Elk Lake and Temiskaming Shore; and John Kenrick for Temagami.

Natural Gas Expansion to Latchford

I have placed calls to Wendy Landry of Enbridge Gas and to the office of Minister Bill Walker, Associate Minister of Energy, as to the status and timing of the announcement regarding the communities that will receive the service. As of this writing I am still awaiting a reply from either one. I remain convinced that no news is good news as everything has been delayed as the government responds to the pandemic.

Fibre-optics

Several residents have mentioned to me that with all the funding that is being touted as available to expand broadband services and whereas we have had limited success with the two broadband services that provide Latchford, it would be a good idea to explore the possibility of acquiring funding to assist our land line service provider to upgrade to fibre-optics. While this makes sense to me, I would appreciate hearing Councils thoughts.
